

# British Heart Journal

Comparison of 12-lead and computer-analysed 3 orthogonal lead electrocardiogram in coronary artery disease <i>R. G. Murray, A. R. Lorimer, F. G. Dunn, P. W. Macfarlane, I. Hutton, and T. D. V. Lawrie</i>	Calcific coronary embolization associated with cardiac valve replacement. Necropsy x-ray study <i>I. Steiner, A. Hlava, and J. Procházka</i>	816
Orthogonal electrocardiogram, apex cardiogram, and atrial sound in normotensive and hypertensive 50-year-old men <i>J. Wikstrand, G. Berglund, L. Wilhelmsen, and I. Wallentin</i>	Anatomical variants in aortic atresia. Potential candidates for ventriculo-aortic reconstitution. <i>R. M. Freedom, W. G. Williams, M. R. Dische, and R. D. Rowe</i>	821
Linear densities in mitochondria of human myocardial cells <i>J. R. Kake, H. A. Berkoff, G. M. Kroncke, and N. J. Bittar</i>	Pancarditis affecting the conducting system and all valves in human African trypanosomiasis <i>A. A. Poltera, J. N. Cox, and R. Owor</i>	827
Effect of acute administration of propranolol on ventricular function in hypertrophic obstructive cardiomyopathy measured by non-invasive techniques <i>C. Saenz de la Calzada, G. M. Ziady, T. Hardarson, R. Curiel, and J. F. Goodwin</i>	NATIONAL MEDICAL LIBRARY Pathology of hearts after aortocoronary saphenous vein bypass grafting for coronary artery disease, studied by post-mortem coronary angiography <i>Brian E. Heard</i>	838
Diazepam in acute myocardial infarction. Clinical effects and effects on catecholamines, free fatty acids, and cortisol <i>M. Melsom, P. Andreassen, H. Melsom, T. Hansen, H. Grendahl, and L. K. Hillestad</i>	Case reports Endomyocardial fibrosis associated with daunorubicin therapy <i>R. G. Wilcox, P. D. James, and P. J. Toghill</i>	860
Significance of angina pectoris in aortic valve stenosis <i>A. B. Mandal and Ian R. Gray</i>	Treatment of scleroderma heart by D-penicillamine <i>Martin Muers and Wilfred Stokes</i>	864
	Mobitz II AV block within the His bundle, with progression to complete heart block <i>L. M. Amuchástegui, E. Moreyra, and L. E. Alday</i>	868
